

Over 40 women's health, Pune, India

Evaluation 2009

1. Introduction. Please briefly outline the project, its purpose and overall achievements.

In India cancer is the third leading cause of death so we are doing awareness as well as diagnosis camps for cancer. Cervical cancer is the commonest cancer in India. The Over- Forty Women's Health project is making women aware and motivating them to go for checkups regularly, We teach them self examination for breast cancer. Women are always neglected by the community & also by family members, & even by the women themselves. Women always ignore their health problems because they always think about economy & give the family priority. We want to make community members aware of HIV Aids by doing street plays. Sex education is offered through residential camps for school and college students as well as drop outs in the community. We are also working in a tribal village. We will do all the above programs for very poor people.

2. People assisted (target group). Please provide details on the people assisted by the Project. What were the type and level of needs and/or issues you encountered?

Very poor tribal people slum people women there is need of awareness alcohol effect on our body .HIV aids awareness through street plays there are awareness among them now we ask many questions regarding this issues to them but still there is need of this programs.

3. Number of people assisted. Please record the number of people who benefited from the project.

About 2040 people

4. Assistance provided. Please describe what services were provided to the target group.

We provide information about cancer in women and alcohol effects on body aids
Awareness in group pregame and camps services like counseling and information we gave them
Also we arranged street plays on addiction and gave message how it affect on life.
Arranged free of cost pap smear test for women.
Cancer awareness program.

5. Outcomes achieved. Please describe what the target group achieved as a result of receiving assistance.

Improvement in medical knowledge motivation confidence personal development
When our medical camp finish next day only remaining women came for check up
And told their friends also some of them saying are not drinking alcohol but our awareness program on de addiction they are admitted about that they are ready
For take admission in admission in de addiction center

6. Other Achievements. Please describe other areas of achievements of the project.

We achieved community building in our areas and we did sustainable change
Because now women are aware about their health there is inner motivation
We can see they are going willingly to do pap smear they want do more awareness program
For their children they don't want to they drink alcohol

7. Any other comments - Provide any other information relevant to the project.

We are doing adult education also for this group
